

120" ALR Screen - ELPSC36

Take full advantage of a bigger display with our 120" ALR screen.

The Epson ELPSC36 fixed frame screen is a 120" diagonal ALR projection screen designed for use with Epson ultra-short-throw laser projectors.

Enhanced viewing for any setting

Whether you're hosting a meeting in the boardroom or enjoying a movie night at home, this screen delivers an exceptional viewing experience. Perfect for presentations, gaming or sports, it offers a versatile solution for both professional and personal use.

Optimised for bright spaces

The ELPSC36 slimline Ambient Light Rejection (ALR) screen boosts image clarity in bright, well-lit environments, by reflecting and directing projector light towards the viewer and rejecting ambient light. This improves black levels and contrast, and provides a bright, richly coloured image with clearly discernible detail.

Clear from every angle

The screen features a wide viewing angle, ensuring sharp, vibrant images are visible from multiple positions in the room. Whether seated directly in front or off to the side, everyone gets a great view - ideal for collaborative meetings or group entertainment.

Big screen, less hassle

Designed to work seamlessly with Epson ultra-short-throw projectors, this screen offers a flexible, space-saving solution for any room. Its lightweight, portable design makes it easy to relocate, making it a smart choice for both home environments and dynamic office spaces.

KEY FEATURES

- **Stylish**
Modern thin bezel design

PRODUCT SPECIFICATIONS
